

Convenient, Rugged Transfer and Storage

The Lasermix Roll Systems StackRack™ AT is ideal for transferring forms off-site, negotiating rough paths, and transporting via truck. Used with the RST3 AutoLoad™ Tilt Table, it is a part of a complete forms handling system.

The simple, inexpensive design and solid construction of heavy gauge, welded steel make the StackRack AT cost-effective and durable. The large, rugged wheels and large handle improve maneuverability on rough surfaces and facilitate transport via truck.

The two sections of the StackRack AT facilitate reliable transfer of up to 20,000 forms to off-site finishing operations.

Significant benefits of the StackRack AT include:

- Space efficient
- Rugged and durable
- Convenient height for operator ease
- Maneuverable on rough surfaces
- Handles forms as large as 14 x 18"

Specifications:

Height:	55 inches (140 cm)
Width:	22 inches (56 cm)
Length:	46 inches (117 cm)
Weight (empty):	143 lbs. (65 kg)
Shelf size:	14 x 18 inches (356 x 457 mm)
Capacity / section:	10,000 forms
Form width:	8 to 18 inches (203 to 457 mm)
Max. form depth:	14 inches (356 mm)
